Blending

It is recommended that you blend **Creative Stone** for size, shape and color range before installation.

For more detailed installation instructions, please contact our office or your local **Creative Stone** distributor.

Creative Stone Limited Warranty

Creative Stone warrants its products for a period of **30** years from the date of purchase. Warranty is limited to the original purchaser and may not be transferred to any subsequent owner. Installation must conform to local building codes and installed in accordance to manufacturer's instructions. Warranty only covers the replacement of the defective material. Any labor to set or remove defective products is not covered.

This warranty does not cover settlement of structures, wall movement, contact with chemicals or paint, staining or oxidation, faulty or improper installation, willful abuse, damage resulting from fire, lightening or earthquake or other acts of nature, discoloration due to air pollution, or other causes beyond the control of Creative Stone.

Cost Effective Alternative to Natural Stone
Lighter in Weight for More Installation Possibilities
DIY Friendly

Creative Stone

has the look, the feel and the quality of natural stone. Produced using cement, natural iron oxide pigments, and lightweight aggregates, Creative Stone is a lightweight product that weighs between 7 to 9 pounds per square foot, making it easy to handle and making installation up to three times as fast as natural stone. In addition, Creative Stone can reduce your project costs by over 35%. Because the natural iron oxides used become an integral part of the product, the color is distributed throughout the entire stone. This assures that Creative Stone will retain its color for life.

When choosing an alternative to natural stone, let Creative Stone be your choice. Rest assured that you have chosen the best quality, easiest to install and budget wise product on the market.
